

CQ Field Day, CQ Field Day

Field Day weekend is June 27-28 2026, and this year we will set up the TARS Field Day operation at the American Red Cross facility on Stockwell Rd in Evansville. We will start setting up on Friday June 26 around 5PM-7PM Central and will continue station setup starting at 8am Saturday June 26. We plan to set up at least 3 radio stations plus a GOTA (Get On The Air) station. The GOTA station's sole purpose is to allow folks who rarely or never have operated HF radio to get on the air and make some contacts with the assistance of a seasoned Ham Operator to show them the ropes! So bring your family and friends and come on out to Ham Radio Field Day at the Red Cross on June 27th and 28th 2026.

Ham Operators, please plan on coming out and operating a station for a period of time. We will operate the full 24 hours so if you are a night owl and want to operate some overnight that would be great. Or any time- come on out and help us operate. All ham operators are welcome to work a station.

This is always a very fun exciting weekend and I hope you are planning to join us when you can. I would love to see a record turnout.

Also if you are new to ham radio you are especially invited. There is no better way to learn about antennas and setting up radio stations than watching or helping other hams who have done it before. We always welcome new hams!

Hope to see you all there! 73!
